

The following Listing of Claims will replace all prior versions, and listings, of claims in the application.

**LISTING OF CLAIMS:**

1. (Currently Amended) A heat exchanger formed to be connected to a plurality of heat exchange units, and which is disposed in an indoor unit of an air conditioner, comprising:

a first heat exchange unit having an approximate inverted V shape in cross-section;

a second heat exchange unit that is connected at an angle with one end of the first heat exchange unit; and

a third heat exchange unit that is connected at an angle with another end of the first heat exchange unit, the second heat exchange unit and the third heat exchange unit respectively extend downward from respective front and rear lower ends of the first heat exchange unit[;]] and wherein the second heat exchange unit and the third heat exchange unit have approximately the same length.

2. (Canceled)

3. (Currently Amended) The heat exchanger disclosed in claim 1, wherein the first heat exchanger is symmetrical from front to rear, and the second heat exchange unit and the third heat exchange unit are symmetrical from front to rear.

4. (Previously Presented) An indoor unit of an air conditioner, comprising:  
the heat exchanger disclosed in claim 1; and

a ventilation fan that is disposed so as to be covered by the heat exchanger.

5. (Previously Presented) An indoor unit of an air conditioner, comprising:  
a ventilation fan;

the heat exchanger disclosed in claim 1 that covers front, upper and rear portions of the ventilation fan, and is disposed so that a lower front end and a lower rear end of the heat exchanger are at a height of an apex of the ventilation fan or lower;

a first drain pan that is disposed below the lower front end of the heat exchanger;

a second drain pan that is disposed below the lower rear end of the heat exchanger;

and

a drain path through which drain water discharged from the first drain pan and the second drain pan passes;

wherein the first drain pan and the second drain pan are disposed at a same approximate height.

6. (Currently Amended) The indoor unit of an air conditioner disclosed in claim 5, wherein

the first heat exchanger has an approximate inverted V shape in cross-section.

7. (Previously Presented) The indoor unit for an air conditioner disclosed in claim 5, wherein

the lower front end and the lower rear end of the heat exchanger are positioned at a same approximate height.

8. (Previously Presented) The indoor unit of an air conditioner disclosed in claim 5, wherein

the heat exchanger has a shape that is symmetrical from front to rear.
